

ATM and Branch Security Solutions For Banks

Arkuz ITUS product line is just the right security solution for securing banks to protect and secure their branches and ATM locations. The ITUS devices detect, notify and accurately report the location where any intrusion in taking place to give adequate time to the bank's security response team to respond in time.

What is Arkuz ITUS?

Arkuz ITUS is a GSM & Sensor based security solution to detect any intrusion and threat to bank Vaults or ATM cash vaults. Using high precision sensor and proprietary algorithm it can accurately predict whether there is a real threat due to external force, gas cutter or normal operation of opening/closing the vault. It integrates a remote Siren which can be operated remotely from banks security centre.
